

## Self discharging Crane Skip

The AUTOVID PB Boat Skip is designed for handling rubble, earth and other materials around a construction site. The skip is fitted

with a hinged reinforced bale arm which offers three advantages over traditional circular tipping skips.

1. With the skip sitting on the ground the bale arm hinges to the rear and this, coupled with its low profile, enables easy loading.

2. When discharging, the vertical position of the skip along with its design ensures a quick and complete operation.

3. The skip can be used by the crane operator without the need for an assistant. The cycle of operation is very simple as the crane operator only has to lift and lower the crane hook.

1000ltr Capacity

**BELFAST**

10 Hydepark Road,  
Mallusk, Newtownabbey,  
Co. Antrim BT36 4PY
